

Archrock®

COMPANY OVERVIEW

For strong, dependable service, our customers count on Archrock. We are a U.S. based energy infrastructure company with a primary focus on midstream natural gas compression. Specializing in superior compression services, unmatched technical expertise and an unwavering commitment to safety, we provide consistent, reliable compression and affiliated services to production companies and midstream applications all across the U.S.

We are a premier provider of contract compression with a legacy that spans 70 years. Headquartered in Houston, Texas, Archrock has approximately 1,000 employees and currently operates more than 3.6¹ million horsepower.

COMPRESSION SERVICES

Archrock owns, operates, services and maintains natural gas compression equipment. We provide contract compression services, helping to maximize uptime for our customers.

Our compression services provide customers with increased financial and operational flexibility, allowing them to lock in monthly compression services costs and make capital investments elsewhere in their businesses. We offer a variety of contract compression solutions – from maintenance, overhauls, labor and monthly payments – all individualized to meet specific customer needs.

Archrock built its reputation by reliably and safely operating the largest fleet of contract compression equipment in the U.S. We are a company of natural gas compression experts, strategically combining technologies, products and services to provide exceptional service, offering our customers more confidence with less risk.

We also work with our customers to help them achieve their emissions reduction objectives. We offer electric-drive compression, connect our customers with leading methane monitoring and mitigation technology and have our own patent-pending methane capture system for compression.
